Good morning,

Included are photos of the target site/SMA for SC-S083 (RM 5.7 E). The SMA is difficult to access. Areas accessible by the Cayuse that fall within 125' radius are experiencing refusal on 15' cores due to rocky sediment/debris. The Pre-RD group has thus decided to move closer to the target location and extract Sediment using a 10' core (photographed below).

Jonni
